# Origo Quest 1 November 2017

#### Monthly comment

Quest \* lost 3.68%. Short positions contributed positively, while the long positions contributed negatively during the month. The markets have developed in different directions this year . Cyclical companies have performed strong while domestic small caps as a group have remained at unchanged levels. We note that several of the Fund's most important investment themes have not been optimal. The gap has widened in the second half of 2017. However, our strategy is long-term and periods of rotations usually come and go. Cyclical companies are valued at record levels now, and the only thing we can be sure is that they just are cyclical. As we are increasingly sceptical to the major indices (read: large cyclical companies), new opportunities have emerged on the small cap side. We have therefore made several changes in the portfolio recently. Company of the month: Momentum Group, recently spinned-off from B & B Tools, is in a phase with increased operational efficiency. Better product mix, a central warehouse and closure of unprofitable stores are important ingredients in the change. The latest report (Jul-Sep) also showed a substantial improvement in earnings (+ 29%) and the operational leverage is high. \*Quest 1 Class A

1) Hedge Fund Index Equities (latest monthly figure is an estimate). See www.hedgenordic.com for more info. 2) OMRX-T bill 90 d (T-bill index) 3) The funds overall measure of risk. Shows how returns vary in annual terms over time. 4) The Fund's annualized return since inception (Class A). 5) Important measure of whether the manager has been paid for the risk taken (risk-adjusted return). 6) A measure of how responsive the return has been vs the market (Small Cap Index). 7) Value-at-Risk is a probability based measure of the size of the risk over a certain period of time. (Origo Capital use 1 day with 95% confidence) 6) The market value of the long positions (holdings of securities) + short positions (short gold shares and negative exposure,% of Fund). 9) Market value of the long positions minus short positions and negative exposure,% of fund. NOTE: Risk figures are usually based on a 24 month history, and in some cases have a one month lag.

## Short on Origo Quest 1

Quest 1 is an equity-oriented hedgefund with a focus on small-cap companies that are in a period of change. The companies will mainly be denominated in the Nordic countries and have a market capitalization that is smaller than SEK 10 billion at the time of investment.

The investment philosophy is based on the following cornerstones:

- Specialized in small caps
- Engaged and active owners
- Long-term investors
- Focus on development of portfolio companies

The core of the fund consists of long-term holdings (12-20 companies), where the team has identified significant potential, while the level of risk is deemed reasonable. The management team often takes an active role in the change process.

The portfolio is supplemented periodically with a varying degree of short positions (short selling), interest-bearing-investments and various derivatives, with the aim to achieve the desired risk profile. Gross exposure (long + short positions) may vary between 0-200%. The goal is to create absolute return of 10-15% per year and that the risk will be lower than the stock market risk, measured as an average over 3-5 years.

Investors who are considering investing in Quest 1 should take into account that funds of this type can both increase and decrease in value. The investment horizon should be at least 3-5 years.

### The investment team

Fund manager is Stefan Roos and Carl Rydin is Investment Analyst. Stefan is a specialist in smallcap companies and has received several awards for his fund management. Stefan has worked at, among others, Handelsbanken Funds and SEB Funds as investment manager, shareholder-representative and team leader. Carl Rydin has international experience from both M&A and the hedge fund industry. Most recently, he was an Investment Manager at New York-based Lucerne Capital Management. Together the team has more than 40 years of professional experience in the stock market.

#### **Risk Information**

This monthly update is produced by Origo Capital. Advice and information are based on sources that Origo assessed as reliable. Information on taxes is based on the rules that apply today. The tax rules may change over time. Tax consequences for you depends on your individual situation. In terms of funds and other financial instruments as described above, historical return is no guarantee of future returns. The value of your fund units and other financial instruments as described above, historical return is no guarantee of future returns. The value of your fund units and other financial instruments can both rise and fall in value and there is no guarantee that you will get back the amount invested. For funds that invest in foreign markets or instruments in foreign currency, changes in currency exchange rates can cause the value of fund shares or other instruments to rise or fall. Explanations and definitions of terminology and abbreviations are found on the first page of this document. Additional information, including fact sheets and information brochure for the Fund, can be obtained from your contact at Origo Capital or downloaded at www.origocapital.se.
