

Monthly comment

Quest* lost 2,64% in January. Nilfisk and NKT lost some ground after a strong development in December, thereby contributing negatively, while Cherry traded the opposite way and contributed positively. The short positions had a negative return as a group. We also noted that the gap between "value companies" and "growth companies" continued to increase, which in some extent also affects a value-focused fund such as Quest. However, as long-term investors, we do not worry too much about this, but consider the short-term fluctuations as interesting business opportunities.

New payment solutions and e-commerce development have been and still are important investment themes for the fund. We previously owned DIBS, which was acquired, and Qliro is still one of the fund's most significant holdings. The fund's third fintech investment is Paynova, which is an active holding for us, and now we consider that the company has taken several decisive steps recently. In 2016, much was about launching the payment service and implementing the solution for the first customer SJ. In 2017, a much needed strengthening of the board and the market side occurred while the company was being capitalized. Recently, the company has received another 5-6 new customers, where the contract with the e-commerce company Skruvat.se stands out as extraordinarily interesting in our eyes. We estimate that 2018 may be the year when the clientbase will continue to grow, full concept validation and growth accelerating.

1) Hedge Fund Index Equities (latest monthly figure is an estimate). See www.hedgenordic.com for more info. 2) OMRX-T bill 90 d (T-bill index) 3) The funds overall measure of risk. Shows how returns vary in annual terms over time. 4) The Fund's annualized return since inception (Class A). 5) Important measure of whether the manager has been paid for the risk taken (risk-adjusted return). 6) A measure of how responsive the return has been vs the market (Small Cap Index). 7) Value-at-Risk is a probability based measure of the size of the risk over a certain period of time. (Origo Capital use 1 day with 95% confidence) 8) The market value of the long positions (holdings of securities) + short positions (short sold shares and negative exposure, % of Fund). 9) Market value of the long positions minus short positions and negative exposure, % of fund. NOTE: Risk figures are usually based on a 24 month history, and in some cases have a one month lag.

Short on Origo Quest 1

Quest 1 is an equity-oriented hedgefund with a focus on small-cap companies that are in a period of change. The companies will mainly be denominated in the Nordic countries and have a market capitalization that is smaller than SEK 10 billion at the time of investment.

The investment philosophy is based on the following cornerstones:

- **Specialized in small caps**
- **Engaged and active owners**
- **Long-term investors**
- **Focus on development of portfolio companies**

The core of the fund consists of long-term holdings (max 20 companies), where the team has identified significant potential, while the level of risk is deemed reasonable. The management team often takes an active role in the change process.

The portfolio is supplemented with a varying degree of short positions (short selling), interest-bearing-investments and various derivatives, with the aim to achieve the desired risk profile.

Origo Capital – Value creation model

- Differentiate
- Business model
- Technology, service etc.

- Execution

The investment team

Fund manager is Stefan Roos and Carl Rydin is Investment Analyst. Stefan is a specialist in small-cap companies and has received several awards for his fund management. Stefan has worked at, among others, Handelsbanken Funds and SEB Funds as investment manager, shareholder-representative and team leader. Carl Rydin has international experience from both M&A and the hedge fund industry. Most recently, he was an Investment Manager at New York-based Lucerne Capital Management. Together the team has more than 40 years of professional experience in the stock market.

Risk Information

This monthly update is produced by Origo Capital. Advice and information are based on sources that Origo assessed as reliable. Information on taxes is based on the rules that apply today. The tax rules may change over time. Tax consequences for you depends on your individual situation. In terms of funds and other financial instruments as described above, historical return is no guarantee of future returns. The value of your fund units and other financial instruments can both rise and fall in value and there is no guarantee that you will get back the amount invested. For funds that invest in foreign markets or instruments in foreign currency, changes in currency exchange rates can cause the value of fund shares or other instruments to rise or fall. Explanations and definitions of terminology and abbreviations are found on the first page of this document. Additional information, including fact sheets and information brochure for the Fund, can be obtained from your contact at Origo Capital or downloaded at www.origocapital.se.
